Return on Rate Base Computation

- Ç The data used in calculating rate base are averages.
- Ç Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.
- Ç For municipal utilities, do not include contributed plant in service, property held for future use, or construction work in progress with utility plant in service. These are not rate base components.
- Ç For private utilities, do not include property held for future use, or construction work in progress with utility plant in service. These are not rate base components.
